DETAILED ACTION

Status of the claims

The amendment filed on September 18, 2002 is acknowledged and has been entered.

Claim Objections

Claim 22 is objected to because of the following informalities: The use of improper Markush language is noted in claim 22, line 14 "or" should be --and--.

Claim 22 is objected to because of the following informalities: "sulphate" should be --sulfate--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 22-26 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

On page 21, lines 11-20 in the specification. The applicant discloses mixing a sample of body fluid, from a mammal, with at least one compound effective to optimize the signal to noise ration (the compound exemplified herein is heparin. On page 29, lines 13-18 in the specification, applicant discloses that

it became apparent that the addition of a polyanion was required to aid in the charge neutralization of the MBP. After optimization experiments were performed, heparin was chosen because it significantly improved the distinction between control and MS patients while maintaining an excellent signal to noise ratio with the positive control. Applicant also discloses the addition of heparin to buffer on pages 37, line 15; page 40, line 17 and pages 41 and 42. The applicant does not disclose heparin sulphate bound to non-specific binding sites on MBP. Further, the specification does not disclose heparin bound to non-specific binding sites on MBP. There is no description in the specification disclosing heparin sulphate or heparin bound to non-specific binding sites on MBP.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 22-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22, line 7 "effective" is vague and indefinite. It is unclear what is considered to be effective. Further, there is no definition or guidance provided in the specification for the term "effective".

Conclusion

No claims are allowed.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
